By Brian Edgar Jones
I presumed from the title that the book would deal with American Pottery and Porcelain exclusively. There were 100s of American potteries not listed. But there were a lot of marks shown for English and European makers. A better title would be "Marks on Pottery Porcelain of the 1800 top makers worldwide." All in all I was disappointed.

The most common marks that appear on antique American ceramics in today's markets are presented in alphabetical order. Pottery factories from the 1840s to 1930s and beyond are included. Each hand-drawn mark shown with the factory name, address and date range.

This companion guide to the 1100 Marks on Foreign Pottery Porcelain focuses on marks of wares of American origin. All major manufacturers and a generous sampling of influential studios can have their pieces identified with minimal effort thanks to the aid of this book. For additional reference, dates of production and types of wares produced have been listed for each entry. -- Book Description
