A Collector's Guide to British Police Diecast Models

Phelim Karl Bickerton : A Collector's Guide to British Police Diecast Models before purchasing it in order to gage whether or not it would be worth my time, and all praised A Collector's Guide to British Police Diecast Models:

An insight into British Police and model collecting. The must have collectors book for the British Police model collector and enthusiast.

About the Author Karl Bickerton is a retired police officer, now living in Spain. He has made a particular study of police diecast models, which he has collected since the 1960s. Most of his collection deals with the British police and the history and use of vehicles and support equipment, as well as their connection to police programmes and the public interest. In retirement Karl still takes an interest in vehicles, which now include planes (he is a qualified pilot) and motorcycles (he and his wife both ride a Harley Davidson Road King - living life to the full!)
