If you are interest in seamen, Royal Navy, late 18th Century sailing - you will enjoy this book.0 of 0 people found the following review helpful. For the fan of Nelson's navyBy Stan WBeautiful pictures, some text.2 of 2 people found the following review helpful. Excellent photography historyBy D.S.Outstanding accompaniment to the O'Brian series. Wonderful photographs, background information and historical tidbits bring the 1800's British Navy into even clearer view.

From tar-ladles and snuff-boxes to sailmaker's fids and carronades: a gorgeous photographic essay on the nautical worlds of Jack Aubrey. The extraordinary photography in this book was inspired by the author's reading of Patrick O'Brian's Aubrey/Maturin novels. In small museums along the English coast, and in private collections, James McGuane has recorded artifacts recovered from shipwrecks and preserved by modern conservation techniques. Taken together, these unique treasures provide a window onto the everyday life of sailors and officers in the Royal Navy of the Napoleonic era. Thanks to advances in marine archaeology, it is often possible to establish the exact identity of a wrecked warship, along with the date and circumstances of its sinking. We are thus provided with a moment frozen in

time: tools, clothing, utensils, weapons, and fragments of the ship itself startlingly intact. These photographs bring home to the reader as words alone cannot what a sailor's life in that time was really like. Also photographed here is Admiral Horatio Nelson's flagship HMS Victory, proudly preserved at Portsmouth. Victory survived the great fleet action at Trafalgar, where Nelson himself died, and it is still a commissioned ship in the Royal Navy. Photographs
