The values do include fare to excellent estimated prices (by car condition) in and out of ...By bigolds70'I have found this guide to be very detailed though out! Although the estimated values seem to be kinda high on a JUST A FEW cars in todays market place.The values do include fare to excellent estimated prices (by car condition) in and out of the original packaging (instead of just one value like most guides) I like the fact that the cars that were available in various colors each have there own estimated value listed per color. Even the Hot Wheels buttons have listed values! (this is the only book I have found this in!!) And each car has a very detailed history included! The overall redline history is repeated though, but that's ok as I'm really interested in such

variations as, wheels, paint, ect. of which there are detailed price listings for each variation per car! Also included are starting year, midyear and late production changes (if any) per car listed and changes in value (were applicable) I feel that this book is more informative than most comparable guides on this subject written much later than this one being produced in 2009! I only wish that there was a updated version available!! There's even a section devoted to preproduction and prototype models and there history's alongside track sets, accessories and there values! Again, judging them by there projected conditions not fantasy prices! I have been collecting Hot Wheels cars for over 40 years now and of all the H.W's books that I own this is one of my very favorite go to guides!! Again: I just wish there was an updated version available! 5 stars!!0 of 0 people found the following review helpful. Essential button guideBy Rasta manThis book is the only one I have found that addresses my hobby of collecting red-line buttons.I hope to see it periodically updated to reflect changes in the hobby.0 of 0 people found the following review helpful. A Must!By Otto StewartA wonderful guide on the early Hot Wheels cars and trucks with \$ values for each casting and color of such castings. If you're shopping for old Redline cars on the auction sites or you find one at a yard sale, this is an absolute must! It's a great way to see if you over paid or got a great deal on these cars!

Die-hard collectors of pocket-sized racers, fans of nostalgia, youngsters and the young at heart will revel in the candy-coloured brilliance and muscle-car-fashioned attitude featured in this pioneer book devoted to the superior Spectraflame cars.From the Beatnik Bandit and Hot Heap to the Python and Custom Camaro, the whole gang of classic miniature cruisers is featured in this one-of-a-kind book of Mattel's mightiest cars. In addition, readers will discover valuable casting information, production data, values, and insight about the differences between U.S. and Hong Kong-made models, in this stunning Spectraflame showcase.

About the AuthorEdward Wershale, 36, has been collecting Hot Wheels his entire life. A member of the online community Redline Online, he has focused on collecting and selling Spectraflame Era cars since 2000. He has more than 400 mint and near mint Hot Wheels in his collection.
