William C Gallagher : Japanese Toys: Amusing Playthings from the Past. (Schiffer Art Books) before purchasing it in order to gage whether or not it would be worth my time, and all praised Japanese Toys: Amusing Playthings from the Past. (Schiffer Art Books):

In the 1950s and '60s, fine-quality Japanese-made toys flooded the market and sold popularly at five and dime stores worldwide. A top-notch Japanese manufacturer of these toys was Toplay Ltd., recognized by their T.P.S. trademark, who also made toys for importers like LINEMAR, Cragstan, Frankonia, Rosko, and Mego. Over 265 motorized, wind-up, battery-operated, tin, plastic, animal, and platform base toys are featured, including authorized editions based on Popeye and Walt Disney*r characters. Information on manufacturers, the trading and import companies, dates of

production, patent drawings, dimensions, descriptions, and original packaging are included. A price guide and identification of over 200 Japanese trademarks complete this useful guide.
