GonzalezThis book is lushly put together by Princess Maria Gabriella the oldest daughter of the last King and Queen of Italy and by far the most knowledgeable and serious of the 4. She was a devoted daughter to both parents and learned many details of the gems and history of the dynasty.Her explanations are very detailed and the photographs are unbelievable. Too bad that because of circumstances so many of these works of the jewelers' art have been sold. We can only hope that they are not broken up as so many historical pieces have in the past.The section of the jewels that were left in the Bank of Rome when the royal family left are incredible. Too bad that they are not placed on display so that they can be enjoyed like the other royal jewels around the world.I bought this book in Rome (in original Italian) and strongly recommend it to all lovers of the jeweler's art as well as those interested in the Savoys.4 of 4 people found the following review helpful. A gorgeous book on royal jewelsBy K. MaxwellThe House of Savoy had three Italian Queens and Queen

Margherita, like Queen Mary of England was a jewellery lover. She bought diamonds and other jewels like pearls to enhance her royal presence and they often pay off in rather stunning jewel draped images of her. The book follows the lives and jewels of Queen Elena and Queen Marie Jose as well as Margherita. Their jewels are shown in lovely clear photos where they survive and enhanced with many rare, large size, photos of them being worn by the various Queens.

This is one of the best books of royal jewels out there to concentrate on a specific family. If you love jewels or are interested in royal families this book is hard to pass up. 1 of 1 people found the following review helpful. Superb BookBy Bookworm70 Jewellery of the House of Savoy is an indebt look of the origins and eventual fate of the precious jewels that belonged to the Italian Queen Consorts. The Authors have graciously included several rarely seen pictures of the Savoyes and their jewels. This book is a must for collectors of Royal Memorabilia.

Margherita, Elena, Marie Jose: three queens and the precious jewels that accompanied the sovereigns of Italy on the important occasions of their existence and of Italian history. The history written by Maria Gabriella of Savoy, the third born child of Italy's last sovereigns, and Stefano Papi, a jewellery historian with an international reputation, depicts the setting of an adventure in collecting that covers over a century of Italian history. The text, accompanied by historic images (many of them never before published) and splendid photographs of the jewels and the original designs for them, guides the reader in the discovery of public events and private moments in the lives of the queens of Italy. This volume, the enlarged English edition, also seeks to pay homage to the great creativity of three Italian jewellers who created the magnificent jewels of the Royals of Italy to match their various official duties.
