I bought this book thinking I was going to get a reference book on military insignia but all I got was a book with a handful of pictures of mostly random military patches and a whole lot of nonsense (mostly raw data) about the size of the military for countries around the world. There was no explanation or description of any insignia (which there were only a few of) or patches. I paid \$0.01 for the book and \$3.99 for the shipping. I overpaid for both the book and the shipping. BTW I have bought many used books for a penny that were great books so don't be deceived by the used book price.
