My Clock Won't Run: The Care and Feeding of Clocks

D. Rod Lloyd : My Clock Won't Run: The Care and Feeding of Clocks before purchasing it in order to gage whether or not it would be worth my time, and all praised My Clock Won't Run: The Care and Feeding of Clocks:

0 of 0 people found the following review helpful. An Excellent Reference for Clock OwnersBy David W. HensleyMy grandfather was a master craftsman who owned a small clock repair shop. He has been gone since 1995, and I have become the owner of some of his clocks. It's good to have this little reference book for which to refer.0 of 0 people found the following review helpful. More like an owner's manual that a repair book.By KlokfixrIf you are looking for a repair manual, this is not it. If you bought a cuckoo and perhaps the chains came off the gear in shipping... This may

help. Otherwise, there is some good yet very basic info on how clocks work and putting a clock "in beat." The best bit of advice given in this book is if you want to repair clocks, get Steven Conover's book "clock repair basics", and "don't touch the music box of a cuckoo." 0 of 0 people found the following review helpful. Good read I learned a little. By Patch917I enjoyed the reading of this book. I learned something's I did not know. Now I am looking for something more in depth.

A clock service guide for clock owners with NO prior clock skills. Mechanical clocks are now considered works of art, a part of history, a part of the family and they also need love. Sooner or later, your treasured time piece will stop. Your choice is to either live with it in silence or go to a hard to find repair shop, leave it for weeks and pay perhaps hundreds of dollars to get it back, hopefully working. Fact is, you can more than likely do the same thing they do, by yourself. There are little known items that stop a clock that you can easily do yourself for little or no money. You can even oil your clock for just a few dollars worth of oil. You can service: Grandfather Clocks, Mantel Clocks, Wall Clocks, Kitchen Clocks, French Clocks, Cuckoo Clocks, etc. No special tools needed besides oil which I will tell you where to buy very inexpensively. I will teach you how to service your own clock. No prior experience needed.
